

**PAR** EverServ<sup>®</sup> 600

Our most versatile and reliable  
point-of-sale terminal

**Ready to work as hard as you do, the PAR EverServ 600 Series has been proven in a wide range of concepts across the most demanding hospitality environments.**

# Keep orders flowing and process payments quickly with a POS terminal that works the way you do

Keep guests happy through your toughest lunch crunch and busiest dinnertime

## Built from the ground up to handle harsh restaurant kitchen environments

The PAR EverServ 600 Series serves the full range of concepts and service types, from counter to sit-down

- Range of configurations and use cases: counter terminal or wall-mounted for ordering/payment or time clock
- Choice of features including customer-facing display, mag stripe reader, and biometric scanner
- Performance options to suit your needs

## Proven to withstand 'extreme hospitality' with industry-leading MTBF (Mean Time Between Failure)

EverServ 600 POS Terminal from PAR is reliable yet durable enough to stand up to messy moments, day after day

- Rugged and durable in high-traffic and harsh food service conditions
- Passes intensive heat and humidity testing in a test chamber plus extensive field testing before being released to market
- Sleek design will look attractive in your venue

## One POS Terminal That's Suitable for Any Concept

Meet PAR's flagship terminal series for brands of all shapes, service types, and sizes

- Easy to set up, even easier to use
- Avoids clutter at the counter extensive field testing before being released to market
- Sleek design will look attractive in your venue

Enhance guest service and lower costs with flexible, portable ordering hardware

## One ordering hardware solution for all the places and ways you serve guests

- Take orders and payments anywhere with a single hardware solution: table-side, at the counter, line busting, in the drive-thru, and curbside
- Send orders to the kitchen more quickly from the ordering point, whether table-side or line-busting

# Simplify ordering and payments with a flexible solution that works across all your points of order.

## Handheld and terminal in one

- Easily transform from handheld mode into a countertop terminal using the optional docking station
- What crunch time? Bust through lines, offering guests a range of payment options that include NFC/RFID for quick and secure mobile payment processing
- Built-in front- and back-facing cameras can capture QR codes and bar codes useful for scanning loyalty tokens, payment wallets, and coupons
- Maximize your service options with a range of peripherals including printers, cash drawers, and payment hardware

## Rugged and ready for the most demanding hospitality environments

- Industrial-grade durability with Gorilla® Glass scratch-resistant screens, a 3-foot drop rating (up to 6 feet with optional Tablet Shield), and liquid and dust resistance
- Built-in Wi-Fi enables crew to serve guests anywhere on the property
- Bright 800-nit Projected Capacitive Touch (PCAP) screen viewable even in intense light situations
- Powerful Intel® Atom processor to process orders and payments more quickly
- Optional quad charger ensures your tablets are always ready to use

**CPU:** Intel Atom x5-E3940 CPU

**Battery Life:** Up to 10 Hours

**Memory:** 4GB RAM

**Storage:** 64GB (Solid State)

**OS:** Windows 10

**Camera:** Built-in front (2MP) and rear (8MP)

**Screen sizes:** 8-inch and 10-inch

# Improve service velocity and accuracy in your drive-thru

Supercharge your most profitable service channel with our guest-friendly drive-thru solution

**PAR Drive-Thru is a complete solution that helps your crew and your brand deliver fast, accurate service and the convenience that guests demand**

- Maximize throughput with the intuitive PAR Drive-Thru Timer
- Gamify speed-of-service improvements with crew-facing dashboard that promotes competition among stores
- Improve order accuracy with crystal-clear headset communications

# Elevate your drive-thru experience to keep guests coming back

## Optimize operations and motivate your crew with the PAR Drive-Thru Timer

Restaurants using PAR Drive-Thru Timer typically reduce service times by at least ten seconds per vehicle. The result is five additional vehicles processed per hour, for more revenue with the same crew in the same amount of time. A typical return on investment is less than one month.

- When crews compete, everyone wins. Crew-facing screen gamifies speed of service, motivates crews, and incentivizes improvements. See real-time service time rankings, car positions, and more
- Instantly identify and correct service issues, such as bottlenecks and training opportunities, to give guests the convenience they expect. Near-real-time reporting suggests ways to improve important service metrics
- Access above-store reporting on any web-enabled device for one or many locations. Easily filter data to achieve the view you need: enterprise, region, site, and even individual transactions

## Keep orders flowing with the market-leading PAR G5® Headset

Unmatched sound clarity pairs with modular design for truly pleasant and accurate ordering conversations.

- Clear audio quality improves communication and order accuracy, keeping both your crew and guests satisfied
- A comfortable, ergonomic fit makes the G5 a headset your crew will actually enjoy wearing
- Rock-solid construction and easy battery replacement improve uptime
- Modular design simplifies component replacement, saving you money should something break

## Wow drive-thru guests with your ordering, payments, and fulfillment prowess

From terminal to tablet, window to line-busting, PAR offers a range of software and hardware solutions that work as hard as you do

## Bring out the superhero in your kitchen crew with a kitchen display system that connects your ordering and fulfillment service points

Keep the line moving, dramatically improve efficiency, simplify prep, and avoid waste with PAR KDS

- Avoid drive-thru order pickup errors by automatically identifying cars out of sequence and notifying crew at pickup window (when used with Brink POS)
- Display orders from any of your ordering channels (when used with Brink POS)
- Track speed of service and alert your crew to critical time thresholds that can be configured to change color and/or flash

# OverDrive Drive-Thru Timer System and Analytics

WIRED & WIRELESS

## Benefits:

### Return on investment in six months or less

- Animated visual display highlighting drive-thru progress and bottlenecks
- Enhanced customer satisfaction by lowering drive-thru times
- Excellent management tool
- Detailed store and local reporting tool
- A creative tool to develop crew and restaurant competitions

## Features:

- Proactive, online monitoring for all hardware
- Options for monitoring Fast Forward, and/or Mobile Parking Positions (Wireless Timer)
- Parameters are timed and color coded to illustrate drive-thru performance
- Clear, concise and simple graphics
- Customizable by hour or day
- Critical information is available at a glance to highlight road blocks to performance
- Simplified, user-friendly software interface
- Time can be displayed in minutes or seconds
- Supports most restaurant configurations
- Capable of connecting multiple displays

## Wired Timer

- Interfaces with all headset systems including Techknow
- Leverages existing induction loops at all detection points

## Wireless Timer

- Minimized maintenance related to induction loops
- Aesthetically pleasing and less invasive to the driveway
- Enables the practical measurement of Pull Forward, Preview, or Mobile Park positions parked cars
- Up to 50 vehicle detection points per restaurant
- 900 MHz frequency bands minimizes interference and maximizes wireless coverage, 2.4 GHz frequency band used internationally

- 1 Displays average time for the last 5 cars at those locations
- 2 Individual, animated cars proceed through the drive-thru with color coding to indicate time in queue
- 3 Last 5 Car Average
- 4 Shows percentage of defined goal met
- 5 Indicates a vehicle has driven off without completing the drive-thru circuit
- 6 Displays time a current vehicle has been in queue and changes color based on goals
- 7 Displays Window Times average for the last hour with color coding
- 8 Displays Mobile Time, when car arrives the time will start counting and show a car there

## Drive-Thru Statistical Reporting Software

In the quick service industry, time can cost you money and result in a loss of business. Using a computer in the store or remotely, you can retrieve statistics collected by your system.

### These statistics can help you:

- Increase speed of service and enhance customer satisfaction
- Set sales and drive-thru goals
- Identify and reward productive employees
- Improve your drive-thru operations

\*Content of statistical report depends on number of loops, POS and other parameters you choose.
