PAR Data Central®

Data Central is the maintenance-free enterprise restaurant management solution that enables you to leverage insights into higher margins, improve operational efficiencies, and lower food and labor costs!

Instead of subscribing to multiple software solutions, save money with Data Central's Management Suite that conveniently consolidates all of our solutions into one:

- Food and Inventory Management
- Labor and Scheduling Management
- Multi-unit Enterprise Reporting & Analytics
- Tablet/Mobile App (device agnostic)

Data Central is 100% cloud-based and has moved from Desktop to Portal - allowing you to easily access reliable information on your operations, anywhere and any time.

On average, by utilizing Data Central, you can realize:

- **600 hours in savings per year** on Inventory Management + reduced counting mistakes using the Best Practice Inventory Count template in Data Central
- **1-3% drop in labor costs** with Suggested Scheduling tool and self-service Employee Scheduling App

Based on actual sales and COGS before and after using Data Central for a DQ® Operator with 4 stores in St Louis:

- 3% food cost and 1.83% food cost variance reduction by identifying food waste/theft/incorrect usage
- $120k in projected overall savings

"Data Central gave me a platform to control spending, increase profits, and take my business to the next level."

Angela Grindstaff,
DQ® Franchise Owner in Missouri
